

DOI Work Activity 19: Plan/Evaluate Programs to Inform Decisions on Non-Energy Mineral Resources

Program Area:	Knowledge Advancement
End Outcome Goal:	UEO 4 – SUPPORTING SCIENCE – Improve the Understanding of Energy and Mineral Resources to Promote Responsible Use and Sustain the Nation's Dynamic Economy
Intermediate Outcome:	UIO 4.1 – Ensure Availability of Energy and Mineral Resource Information and Systematic Analyses Needed by Land and Resource Managers for Informed Decision Making
DOI Sub process:	2a - Plan

Examples/Notes:

Work Activity Description: Planning, developing, and reviewing science programs. Includes all costs associated with developing strategic and annual/operating program plans, conducting internal and external reviews of programs, assessing science and information needs and priorities, and coordinating crosscutting regional, national and international science planning efforts. This encompasses all work leading to completion of program plans, reviews and assessments. Some of these activities are done in collaboration with customers, stakeholders, and partners so that we may develop and implement programs that are responsive to society's highest science priority needs and improve the effectiveness and impact of programs. **Does not include DOI strategic planning or Bureau strategic planning that are included in DOI Work Activity 67 - Perform Planning.**

Output: Plans and Evaluation Reports (e.g. Program evaluations, Performance Reports, Peer Reviews, 5-yr Plan, PART, effects statement, capability system, Customer Satisfaction Surveys)	Unit of Measure: Number of Plans and Evaluation reports
